

## Recruiting participants for a survey study on upper-limb loss

Are you frustrated with your current upper limb prosthesis? Would you like to see improvements of your current prosthesis? The purpose of this research study is to understand the experience of amputees with upper-limb loss, their perceptions about prostheses and non-invasive sensory feedback provided by such devices.

- 10-minute online questionnaire that can be completed at your leisure
- Chance to win one of several \$25 gift cards

This study is being led by principal investigator Dr. Jeremy D. Brown and co-investigator Dr. Marlis Gonzalez-Fernandez under IRB protocol #IRB00307221. If you meet the eligibility criteria listed below and are interested in participating, please use the following URL [<https://tinyurl.com/jhu-prosthesis-survey>] to enter your email address and receive an individual link to the survey, or simply scan the QR Code with your smartphone's camera app. Your email address is not linked to your survey responses.

### **Eligibility:**

1. Has upper-limb loss/absence/difference
2. 18 +
3. Can answer an electronic questionnaire written in English
